

CCTV CARDS

Print off these cards for the first challenge. They are double-sided.

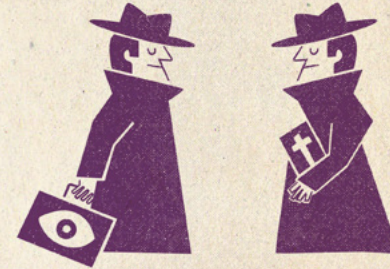

You'll need 20 green cards, eight orange and eight red. This PDF has the correct number of cards needed.

If you can't print double-sided, print single-sided sheets, stick a set of front-sided prints to a set of the reverse of the cards and then cut them out.

The last page includes a diagram showing how you should lay out the cards. Make sure you follow this pattern for the challenge to work properly.
